

## Welcome to our practice!

Please call our office to schedule an examination appointment. An initial examination is necessary to review your medical history, diagnose your condition, determine your treatment and outline the fees for our professional services.

At the time of your exam, please bring any recent x-rays of the area to be treated, a list of medications you are taking and insurance information. You may choose to have your doctor e-mail the x-rays to our office prior to your appointment.

Minors: (anyone under age 18) must be accompanied by a parent your legal guardian at the time of the examination and treatment.

**We look forward to meeting you!**
